

Revolution BMR Forage sorghum

Forages

350mm+

4.8–7.6

Most soil types

Suggested sowing rates

Marginal dryland: 3 – 5 kg/ha

Good dryland: 8 – 10 kg/ha

Irrigated: 15 – 20 kg/ha

Product fit

Any livestock producer seeking a highly palatable, high quality feed and lots of it. Revolution BMR is the perfect choice for intensive grazing, quick regrowth, hay and silage.

Key features

- Superior 12 gene BMR release
- BMR sorghum x BMR sudan sorghum
- Extremely vigorous hybrid well suited to early sowing
- Safe low prussic acid levels - recommended for early grazing
- Fine stemmed and very leafy ideal for hay making and silage
- Higher water use efficiency (WUE)
- BMR technology may boost weight gain and milk production by around 20%
- Contains lower amounts of lignin
- Highly palatable

The ground-breaking 12 gene brown mid rib forage now delivers new standards in intensive livestock grazing, where feed quality is paramount and a bulk of feed is needed.

Revolution BMR is your best option for a highly productive, highest quality summer feed.

Agronomy and management

Genetic type	BMR sorghum x BMR sudan sorghum
Planting time	Spring to summer
Soil temperature at sowing	16°C and rising
Seed size/kg	28,000 – 40,000
Early grazing	Excellent
Stand over	Not preferred
Hay making	Excellent
Green chop	Excellent
Silage - pit	Useful
Silage - plastic wrap	Excellent
