

BAR Cyclone[®] Grain Sorghum

Summer crop

Key Features

- Medium — late maturity
- Compact hybrid
- Excellent tillering
- Tillers quick with even maturity
- Semi open heads
- Good grain size
- Midge test rating of 6.

Key Benefits

BAR Cyclone[®] has a compact uniform height with tillers that mature at the same time as the main head. This ensure simple desiccation decisions and an efficient harvest. It's medium-late maturity gives it high end yield potential, with the ability to yield in all environments.

To maximise yields of BAR Cyclone[®] plant into better dryland with a full soil profile or irrigation at district planting rates. It will tiller to meet the yield potential.

Advantages

- Low lodging
- Uniform height
- Reduced screenings
- Suited to a range of environments.

Attributes chart

Attribute	BAR Cyclone [®]
